Japfa delivers 23,000 live chickens from Indonesia to Singapore

- **The chickens were raised by PT Ciomas Adisatwa, a company within the Japfa Group, in Bintan, Kepulauan Riau, and this is the first time live birds are shipped via sea to Singapore from Indonesia.**
- **This notable achievement was made possible by the collaboration of Japfa with Singapore and Indonesia's authorities.**
- **As one of the largest poultry producers in the region, Japfa is able to meet Singapore's demand and standards for staple protein foods.**
- **Japfa can contribute to Singapore's food security strategy by providing fresh chicken to local consumers.**

Singapore, 14 May 2023 – Leading industrialised agri-food company Japfa Ltd ("Japfa" or, together with its subsidiaries, the "Group") announces the delivery of 23,000 live birds via sea to Singapore.

The chickens were raised by PT Ciomas Adisatwa in Bintan, Kepulauan Riau. PT Ciomas Adisatwa is a subsidiary of PT Japfa Comfeed Indonesia Tbk, which in turn is a subsidiary of Japfa Ltd. This is the first time live chickens are delivered to Singapore from Indonesia. This shipment is a notable achievement and will serve to test a new important option to supply fresh chicken to Singapore, with the birds transported live via sea and slaughtered in the destination country.

The Japfa Group has been working proactively with the authorities of both Singapore and Indonesia to provide fresh chicken to Singapore, in line with the Group's purpose to provide nutritious and affordable staple proteins in an efficient and sustainable way. This first shipment opens up new opportunities to provide not only fresh chicken but also other staple protein foods to Singapore, and Japfa is committed to continue to invest in the Bintan project to support Singapore's food security strategy.

Tan Yong Nang, Chief Executive Officer of Japfa, said: "We are pleased to contribute to Singapore's food security strategy by providing fresh chicken to local consumers. As a leading industrialised agri-food player, with more than 50 years of experience in producing staple protein foods in Asia, we can meet Singapore's demand and standards based on our attention to quality and our vertically integrated business model from poultry feed production and breeding to farming and food processing. This shipment is the result of the combined efforts of Japfa, Singapore and Indonesia's authorities, and we look forward to expanding further our contribution to feed Singapore consumers with nutritious proteins".

Japfa is one of the largest poultry producers in Indonesia and in the region, boasting high standards in quality, food safety and ESG. Today Japfa's activities are critical to feeding people in Indonesia as the Group supplies approximately 20% of poultry products in the market. As such, Japfa has the capacity to meet Singapore's demand for chicken.

Director General of Livestock and Animal Health, Ministry of Agriculture of the Republic of Indonesia, Dr. Ir. Nasrullah, said: "We should be proud because today's export to Singapore is a proof that Indonesian livestock products are of good quality and are able to meet food safety requirements in accordance with international standards. The national broiler meat production in 2022 was recorded at

3.67 million tons. This shows that Indonesia can fulfil the needs for poultry and derivative products not only of Indonesian people but also globally.”

Japfa places a strong emphasis on quality and safety throughout its operations. The company’s farms and processing facilities are equipped with state-of-the-art technology and adhere to the highest international standards of animal welfare, food safety, and environmental sustainability, such as the closed-house systems for poultry production. Japfa’s standards are proven by a number of local and international certifications. For Indonesia these include the Avian Influenza (AI) free compartment certificate, a Veterinary Control Number (NKV) certificate, halal product certificate, application of quality management issues ISO 2200, Hazard Analysis Critical Control Point (HACCP), and Food Safety System Certification (FSSC) 22000.
